PaperStone®

The most ecological surface for interior furnishings.

When a material is produced according to this principle, eco-sustainability becomes a natural choice.

- The values driving this choice translate into clean air, clean water and responsible management of resources.
  Choosing green products means living, working, studying and playing in a healthier environment.
- PaperStone® is constantly committed to the realization of eco-sustainable materials for a holistic, intelligent, elegant and responsible lifestyle.
- PaperStone® is not only natural and pleasant to the touch, but is above all a material that is produced according to socially responsible principles.
  It is strong, durable and extremely resistant to stress from bending. Its beauty is reminiscent of natural materials, like stone and wood.
- PaperStone® is a truly evolved product and has a competitive price point.
  Beautiful and resistant, it offers interior design companies and designers an eco-sustainable solution.
  PaperStone® is NSF® and EC certified as a suitable surface for contact with foods.

Truly Green.
Economically Sustainable.

- Contributes to an elegant and responsible life style.
- Produced responsibly.
- It is an environmentally sustainable product, NSF® and EC certified as suitable for contact with foods.
- It respects the standards set forth by the Forest Stewardship Council and is certified by the Smartwood Rainforest Alliance program.
- Choosing green products and materials means living and working in a healthier environment.

Since it is a natural product, Paperstone may have slight variations due to the raw materials used to make it.
The result is possible differences in appearance between the material sample and the production lot.
